SUMMARY

Come join our team at Bellingham Marine Engineering: We're a growing office that values hard work, competence and initiative. We're looking for individuals who are excited about being the best at what they do and enjoy exploring the boundaries of what's possible. We provide our employees with competitive compensation, advancement opportunities, a comprehensive benefit program and a healthy work / life balance. Our goal is to empower our employees with the resources and incentives to enjoy success on and off the job.

The Company: Bellingham Marine is the industry leader in the design and construction of floating marinas and associated marine structures. Over the last 60 years, we have a strong history of innovation including the first commercially produced floating concrete marina docks, the first floating golf green and most recently one of the first curved, post-tensioned concrete floating docks. We value our role as the quality and innovation leaders in our industry. We have production plants around the world and much of the engineering for our products is developed in our engineering office in Bellingham, WA.

The Position: As a Structural Engineer, you will provide structural design and analysis of floating and fixed marine structures, evaluate project sites to determine environmental loads, establish and maintain strong working relationships with clients, and interact directly with the production / manufacturing departments of Bellingham Marine to develop practical, high quality products and solutions for the marina industry. Successful candidates will be required to complete an administrative background screen as part of the onboarding process.

The Location: We're located in beautiful Bellingham WA, with easy access to the natural wonders of the Salish Sea as well as the Cascade mountains and the numerous rivers. From sailing or sea kayaking to skiing, snowboarding or mountain biking, there are endless outdoor activities within easy reach. Bellingham is located between Seattle and Vancouver BC and hosts Western Washington University as well as many entrepreneurial start-ups. This makes for a vibrant community that values our quality of life, with year-round recreation, excellent schools, short commutes, and established arts and entertainment venues.

Essential Duties and Responsibilities:

- Evaluate project sites for feasibility and to establish project design criteria.
- Review project plans and specifications to verify stated criteria is consistent with actual site conditions.
- Provide structural design and analysis.

- Develop project timelines and work within project deadlines.
- Provide ongoing monitoring of project progress and report progress to clients as agreed upon.
- Work with other Bellingham Marine staff to maintain project continuity and integrity.
- Prepare and submit written reports as needed.
- Update job knowledge by tracking and understanding emerging structural engineering technologies and practices.
- Maintain technical proficiency and participate in continuing education opportunities offered.
- Other duties as assigned.

QUALIFICATIONS

The requirements listed below are representative of the knowledge, skill, and/or ability required to perform this job successfully. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

EDUCATION and/or EXPERIENCE

Bachelor or Master of Science in Civil Engineering with structural concentration. Experience in structural detailing, design of conventional and prestressed concrete, timber design, and structural steel design required.

Experience with wind / wave hindcasting, lateral pile analysis, dynamic analysis of floating wave attenuators, wave mechanics and loads, flotation and stability, corrosion control, and solidworks or other solids modeling software preferred.

LICENSES and/or CERTIFICATIONS

Current registration as an SE (Structural Engineer) with the ability to become registered in Washington State.

COMPUTER SKILLS

Ability to use structural analysis software, computer assisted drafting (CAD) equipment and software fluently. Proficiency with MS Office software, including Word, Excel, and Outlook.

LANGUAGE SKILLS

Ability to read, analyze, and interpret general business periodicals, professional journals, technical procedures and instructions, or governmental regulations. Ability to write reports, business correspondence and procedure manuals. Ability to effectively present information and respond to questions from groups of managers, clients, customers, and the public.

REASONING SKILLS

Ability to solve practical problems and deal with a variety of concrete variables in situations where only limited standardization exists. Ability to interpret a variety of instructions furnished in written, oral, or graphic form.

COMPETENCIES:

To perform this job successfully, an individual should demonstrate the following competencies:

PROBLEM SOLVING
