

# TIMBER DOCK

High performance wood dock systems

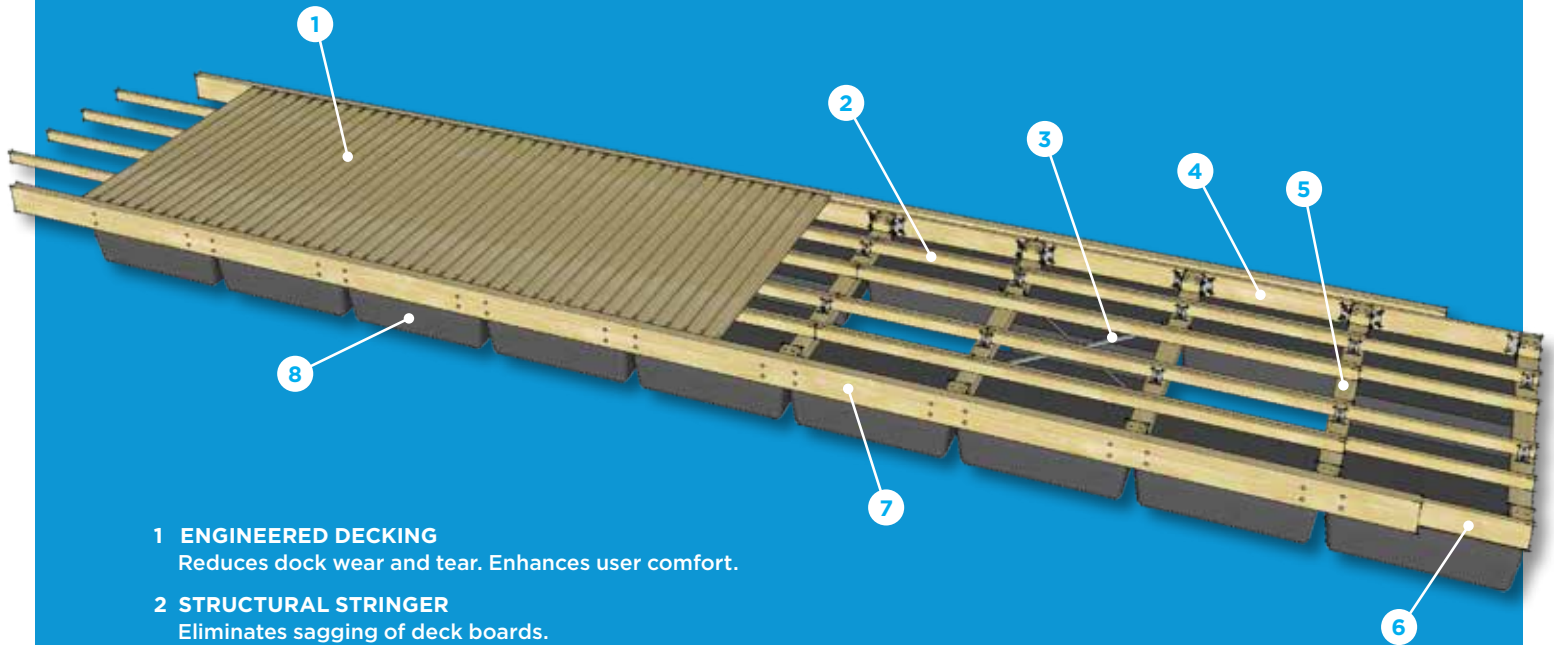

When performance and price matter, Bellingham timber docks are the preferred choice.

# HIGH PERFORMANCE, LOW COST OF OWNERSHIP

Bellingham timber docks are strong, stable and long lasting. Maintenance is near zero. Upgraded components and steel reinforced connections give the dock exceptional durability.

**1 ENGINEERED DECKING**

Reduces dock wear and tear. Enhances user comfort.

**2 STRUCTURAL STRINGER**

Eliminates sagging of deck boards.

**3 ANGLE BRACKET**

Minimizes twisting and racking.

**4 TORSION BEAM**

Limits the docks ability to twist and roll.

**5 CROSS BEAM**

Adds strength and stability.

**6 HEAVY-DUTY TIMBER FRAME**

The foundation for a strong, stable dock.

**7 STRUCTURAL WALER**

Provides strength and stability

**8 FLANGE ROTO-MOLDED FLOATS**

Gives strength and improved performance.

## YOUR DECK, YOUR CHOICE

Customize your dock with a variety of decking options: southern yellow pine, IPE hardwood, composite, aluminum or concrete.

## REDUCE YOUR FOOTPRINT

You can rest easy knowing your dock is constructed from sustainably harvested southern yellow pine. A wax additive injected in the treatment process stabilizes the wood and protects our most delicate marine environments.
