

UNIDECK ALUMINUM TR

Love its look. Marvel at its performance.

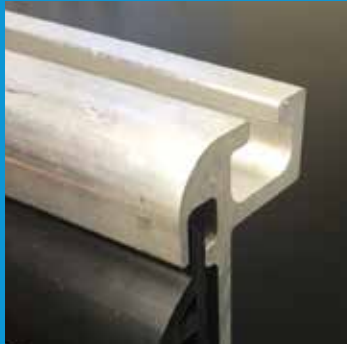

Clean lines, modern finishes, and a reinforced frame.
Introducing the new Unideck Aluminum TR.

THE LOOK YOU WANT PERFORMANCE YOU DESERVE

The Unideck Aluminum TR framed dock system offers exceptional style, strength and stability.

MODERN

Built-in channel holds fendering, no nails or screws required.

FLEXIBLE

Cleats, pile hoops and fingers move with ease.

CUSTOMIZABLE

Endless decking options. Composite, hardwood, softwood or FRP Grating.

A BETTER ALUMINUM DOCK SYSTEM

Most aluminum docks are susceptible to fatigue. The traditional welded aluminum frame with hinged connections has significant performance limitations. Unideck Aluminum TR's unique timber-reinforced frame eliminates many of these shortcomings.

BENEFITS OF THE TR FRAME

- Bends and flexes continually without concern of fatigue
- Stronger - contains no aluminum welds
- Solid and stable under foot
